

Your Dreams, Our Challenge

U.S. Export Control Classification of AGC Nelco America Electronic Materials

AGC Nelco America abides by all U.S. laws and regulations, including U.S. Export Administration Regulations' export controls. AGC Nelco America products are exclusively for use in printed circuit board manufacturing for electronics and are considered commercial commodities (Commercial-Off-The-Shelf or COTS). When used accordingly, all of AGC Nelco America products based on fiberglass (E-Glass and NE-Glass) are designated under the Export Control Classification Number (ECCN) EAR99, which refers to "materials not otherwise specified" for export controls. This includes the following AGC Nelco America laminate and prepreg products:

N4000-6FC, N4000-6NF

N4000-7, N4000-7SI

N4000-12, N4000-12SI

N4000-13, N4000-13EP, N4000-13SI, N4000-13EPSI, N4350-13RF

N4000-29

N4800-20, N4800-20SI

N5000, N5000-30, N5000-32

N7000-2HT, N7000-3, N7000-3NF, N7000-2V0

N8000, N8000-Q

All NH9000, NL9000, NX9000, NY9000 PTFE series prepreg and laminate

All Meteorwave series prepreg and laminate

M-Ply

Mercurywave 9350

EAR99 designated products are still subject to general U.S. export control requirements, and diversion or distribution of such products contrary to U.S. law is prohibited.

U.S. export control requirements continue to change over time and periodic reviews are conducted to ensure compliance with such requirements. For specific inquiries on U.S. export regulations, please refer to the U.S. Bureau of Industry and Security (BIS) at <http://www.bis.doc.gov/>.
