nelco

N4000-13 EP & N4000-13 EP SI

High-Speed Multifunctional Epoxy

Laminate & Prepreg

Nelco N4000-13 EP is an enhanced epoxy resin system engineered for today's lead-free requirements where multiple solder reflow at temperatures approaching 260ºC are required. N4000-13 EP provides enhanced thermal reliability without compromising the electrical and signal loss properties that have made the Nelco N4000-13 product family the industry standard for demanding high speed / low loss designs. N4000-13 EP SI is excellent for applications that require optimum signal integrity and precise impedance control, while maintaining high CAF resistance and thermal reliability.

Key Features

Tg >210°C, outstanding thermal, electrical and signal loss properties

- Excellent thickness control for tight tolerance impedance applications
- Low Df and Dk allows for low signal distortion and faster signal propagation required by high frequency (1 - 10 GHz) and high reliability applications

CAF resistant

- The low Z-CTE and improved CAF resistance provide long-term reliability for both RF and digital applications
- Provides excellent CAF resistance even after multiple lead-free assembly exposures

Signal Integrity Option

- SI® glass available for low-loss applications and enhanced performance

Proprietary advanced resin technology

- Industry standard material with well documented dielectric constant and loss tangent properties

High-Tg FR-4 processing

- Identical processing to N4000-13, similar to traditional high Tg FR-4 materials
- 90 min press at 193°C and 275-350 psi

Lead-Free Assembly Compatible

- Suitable for assemblies with a maximum reflow temperature of 260°C[1]

Available in a variety of constructions

- Available in a wide variety of constructions, copper weights and glass styles including very low profile copper, standard copper, double treat and RTFOIL®
- Available as a 2 mil core product meeting the specifications of a capacitive laminate
- Meets UL 94V-0 and IPC-4101/29 specifications
- RoHS compliant

Applications

- Fine-Line Multilayers
- Backplanes
- Surface-Mount Multilayers
- BGA Multilayers
- MCM-Ls
- CSP Attachment
- Wireless Communication Infrastructure
- High Speed Services
- High Speed Storage Networks
- Internet Switching / Routing Systems

[1] Max suitable reflow temperature for N4000-13 EP assemblies is dependent upon design and fabrication details.

UL file number: E36295
