

Your Dreams, Our Challenge

### ***News Release - AGC Nelco Announces Partnership with East Coast Electronic Material Supply***

AGC Nelco America, Inc. is proud to announce that effective October 1, 2020, they will be partnering with East Coast Electronic Material Supply LLC and East Coast Electronic Material Supply Canada Inc. ECEMS will become the North American distributor for AGC Nelco America's laminate and prepreg materials.

"Since AGC, Inc. purchased the electronics business from Park Electrochemical, Inc. it has been the plan to have a North American Distributor to better service our customers through distribution warehouses and technical sales and service. ECEMS brings years of experience to this partnership and aligns with AGC Nelco America's goals of providing innovative material solutions for advanced interconnects, along with best-in-class technical service and support to our customers. ECEMS's network of warehousing and its infield Technical Sales team will allow for quicker turn time of materials and improved, local technical support" said Chris Mastrogiacomo CEO of AGC Nelco America, Inc.

"We are excited to be growing our relationship with AGC Nelco America, Inc. Working together we are able to tie the ECEMS strength in technical service and logistics with the AGC Nelco local manufacturing and product support to meet the varied needs of our customers as the industry continues to evolve," said John Robinson, President, ECEMS.

#### **About ECEMS**

East Coast Electronic Material Supply, as a principal distributor for AGC Nelco, DuPont Electronic Solutions, Hubbard Hall, AGFA, TCT, and Kyocera, supports over 250 customers across a variety of businesses, including Printed Circuit Board Manufacturing, Aerospace, Military, Research and Development, Chemical Milling, and General Metal Finishing. ECEMS has 10 warehouses situated strategically across North America to supply its customers. Our sales and service people have decades of experience in the industries we serve and are a valuable resource ready to answer all your technical questions and fulfill your product support needs.
