

Your Dreams, Our Challenge

▶ **RE: REACH Regulation**

---

Dear Customer,

All products supplied by AGC Nelco are defined as articles under REACH legislation. This means they are not required to be registered prior to importation into the European Union.

This letter also certifies that the 211 substances of very high concern listed in the table found on the ECHA website at <https://echa.europa.eu/candidate-list-table> and the 70 substances restricted under REACH listed in the table found on the ECHA website at <https://echa.europa.eu/substances-restricted-under-reach> are not intentionally added during production nor would they be expected to be present in the final product, or have been tested and we certify that they are present in levels well below 1000 parts per million. There are two exceptions to this statement:

- N4000-11 prepreg which contains between 0.1% and 0.2% ppm of N,N-dimethylformamide, CAS 68-12-2.
- N7000-1 and N7000-2V0 prepreg contains > 0.3% and <1% of 1-methyl-2-pyrrolidone (NMP), CAS 872-50-4

In both cases the listed solvents are bound in the resin matrix and under normal handling, exposure to these solvents will be negligible.

The information is provided at the request of and without charge to our customers. Accordingly, AGC Nelco assumes no liability for its use.

Sincerely

Vice President and Senior Technologist

AGC Nelco
